

CENTER FOR HEALTHY SCHOOLS
announces the
2015-2016 School Health Leadership Institute

“Creating Safe and Supportive Schools”

A safe and supportive school environment provides students and staff with the resources, policies, and experiences that can improve education and health outcomes. School climate, social and emotional learning, interpersonal skills, relationships, inclusiveness, mental health and physical safety are key elements in creating such an environment. The **School Health Leadership Institute** can provide you with resources and skills to take back to your school or district and become the best you can be.
